The AFCT serves in place of the ASVAB for in-service retesting of all DoD enlisted personnel. It may also be taken by commissioned officers seeking to qualify for programs with ASVAB/AFCT requirements. The AFCT is structurally similar to the ASVAB and all scores are measured in the same way. The web-based AFCT is available at all Marine Corps Testing Facilities.

All waivers for early retest will be considered. However, in many cases, early retest waivers are denied without proof of academic improvement between the score between tests. Some useful sites for academic preparedness toward the AFCT include: DANTES Academics (the e-March2Success (College Readiness Online Course, ACT Online Course, SAT Online Course). The certificates of completion must be uploaded to your NCMIC profile. Additionally, college courses in English, math, science, or history are other valuable ways to improve overall AFCT performance. All waivers for early retest will be routed to MPA Test Control via NCMIS for final approval.

Please Note: Scores do not become official until published in MCTFS. This update can take up to one month from the test date. A Marine that has already attained the basic requirement for an assignment or program requiring a minimum classification test score is not eligible to retest for the sole purpose of increasing their score.
